LIST OF CONTENTS

NUMBER 1

E. Sciubba, S. Ulgiati and N. Lior	1	Editorial
R.A. Herendeen	3	Prospective/retrospective on strategies
H. Herring	10	Energy efficiency—a critical view
H.T. Odum and E.C. Odum	21	The prosperous way down
S.S. Penner	33	Steps toward the hydrogen economy
J.A. Tainter, T.F.H. Allen and T.W. Hoekstra	44	Energy transformations and post-normal science
M. Giampietro, K. Mayumi and G. Munda	59	Integrated assessment and energy analysis: Quality assurance in multi-criteria analysis of sustainability
H. Haberl	87	The global socioeconomic energetic metabolism as a sustainability problem
D. Milia and E. Sciubba	100	Exergy-based lumped simulation of complex systems: An interactive analysis tool
T. Wagendorp, H. Gulinck, P. Coppin and B. Muys	112	Land use impact evaluation in life cycle assessment based on ecosystem thermodynamics
M. Reini	126	A.R.T. (Associated Reversible Transformations) as a basis for thermodynamic cycles analysis
A. Riva, S. D'Angelosante and C. Trebeschi	138	Natural gas and the environmental results of life cycle assessment
S. Tonon, M.T. Brown, F. Luchi, A. Mirandola, A. Stoppato and S. Ulgiati	149	An integrated assessment of energy conversion processes by means of thermodynamic, economic and environmental parameters
A. Valero	164	Exergy accounting: Capabilities and drawbacks

NUMBERS 2–3

M. Lenzen, M. Wier, C. Cohen, H. Hayami, S. Pachauri and R. Schaeffer	181	A comparative multivariate analysis of household energy requirements in Australia, Brazil, Denmark, India and Japan
S. Mirasgedis, Y. Sarafidis, E. Georgopoulou, D.P. Lalas, M. Moschovits, F. Karagiannis and D. Papakonstantinou	208	Models for mid-term electricity demand forecasting incorporating weather influences
P.A. Salam and S.C. Bhattacharya	228	A comparative study of charcoal gasification in two types of spouted bed reactors
L.W. Wang, R.Z. Wang, J.Y. Wu, Y.X. Xu and S.G. Wang	244	Design, simulation and performance of a waste heat driven adsorption ice maker for fishing boat
T.S. Kim and S.H. Hwang	260	Part load performance analysis of recuperated gas turbines considering engine configuration and operation strategy
D. Knutsson, J. Sahlin, S. Werner, T. Ekvall and E.O. Ahlgren	278	HEATSPOT—a simulation tool for national district heating analyses
J.D. Murphy and E. McKeogh	294	The benefits of integrated treatment of wastes for the production of energy
J. Lutz, A. Lekov, P. Chan, C.D. Whitehead, S. Meyers and J. McMahon	311	Life-cycle cost analysis of energy efficiency design options for residential furnaces and boilers

doi:10.1016/S0360-5442(06)00239-8

C. Martín, M.A. Villamañán, C.R. Chamorro, J. Otero, A. Cabanillas and J.J. Segovia	330	Low-grade coal and biomass co-combustion on fluidized bed: exergy analysis
S. Ghosh and S. De	345	Energy analysis of a cogeneration plant using coal gasification and solid oxide fuel cell
I. Taymaz	364	An experimental study of energy balance in low heat rejection diesel engine
U. Kesgin	372	Aircraft emissions at Turkish airports

NUMBER 4

M.J. Kaiser and A.G. Pulsipher	385	Modeling the cost of shut-in production and the value of information in the Gulf of Mexico
J. Bonjour and A. Bejan	409	Optimal distribution of cooling during gas compression
T. Ren, M. Patel and K. Blok	425	Olefins from conventional and heavy feedstocks: Energy use in steam cracking and alternative processes
M.A. Karim and M.N.A Hawlader	452	Performance investigation of flat plate, v-corrugated and finned air collectors
Z. Huang and X. Zhang	471	Well-to-wheels analysis of hydrogen based fuel-cell vehicle pathways in Shanghai
E. Cardona and A. Piacentino	490	A new approach to exergoeconomic analysis and design of variable demand energy systems
M.E. Masoumi, S.M. Sadrameli, J. Towfighi and A. Niaei	516	Simulation, optimization and control of a thermal cracking furnace
P.T. Lacava, J.A. Carvalho, Jr., A.P. Pimenta and M.A. Ferreira	528	Thermal analysis of an enriched flame incinerator for aqueous residues
N. Lior and H.S. Al-Sharqawi	546	Corrigendum to 'Exergy analysis of flow dehumidification by solid desiccants' [Energy (2005) 915–931]
J.D. Murphy and E. McKeogh	547	Erratum to 'The benefits of integrated treatment of wastes for the production of energy' [Energy (2006) 294–310]

NUMBER 5

A. Bejan	551	Editorial Introduction
N. Lior, W. Sarmiento-Darkin and H.S. Al-Sharqawi	553	The exergy fields in transport processes: Their calculation and use
A. Bar-Cohen, R. Bahadur and M. Iyengar	579	Least-energy optimization of air-cooled heat sinks for sustainability-theory, geometry and material selection
A.K. da Silva, S. Lorente and A. Bejan	620	Constructal multi-scale structures for maximal heat transfer density
S.-C. Yao, X. Tang, C.-C. Hsieh, Y. Alyousef, M. Vladimer, G.K. Fedder and C.H. Amon	636	Micro-electro-mechanical systems (MEMS)-based micro-scale direct methanol fuel cell development
T. Kujawa, W. Nowak and A.A. Stachel	650	Utilization of existing deep geological wells for acquisitions of geothermal energy
M.M.P. González, F.J.F. García, I.S. Ramón and H.S. Roces	665	Experimental thermal behavior of a power plant reheater
A.F. Emery and C.J. Kippenhan	677	A long term study of residential home heating consumption and the effect of occupant behavior on homes in the Pacific Northwest constructed according to improved thermal standards

J. Bosbach, J. Pennecot, C. Wagner, M. Raffel, T. Lerche and S. Repp	694	Experimental and numerical simulations of turbulent ventilation in aircraft cabins
K. Fukuyo	706	Application of computational fluid dynamics and pedestrian-behavior simulations to the design of task-ambient air-conditioning systems of a subway station
B. Mattsson	719	The influence of wind speed, terrain and ventilation system on the air change rate of a single-family house
M. Prek	732	Thermodynamical analysis of human thermal comfort

NUMBERS 6–7

C.K. Woo, L.C.H. Chow and N. Lior	745	Editorial Introduction
C.K. Woo, M. King, A. Tishler and L.C.H. Chow	747	Costs of electricity deregulation
A. Al-Sunaidy and R. Green	769	Electricity deregulation in OECD (Organization for Economic Cooperation and Development) countries
S.D. Thomas	788	Electricity industry reforms in smaller European countries and the Nordic experience
X. Yi-chong	802	The myth of the single solution: electricity reforms and the World Bank
J.H. Williams and R. Ghanadan	815	Electricity reform in developing and transition countries: A reappraisal
A. Tishler and C.K. Woo	845	Likely failure of electricity deregulation: Explanation with application to Israel
R. Haas and H. Auer	857	The prerequisites for effective competition in restructured wholesale electricity markets
S.V. Bajay	865	Integrating competition and planning: A mixed institutional model of the Brazilian electric power sector
U. Helman	877	Market power monitoring and mitigation in the US wholesale power markets
I. Horowitz	905	A law enforcement perspective of electricity deregulation
Y. Li and P.C. Flynn	908	Electricity deregulation, spot price patterns and demand-side management
H.-p. Chao	923	Global electricity transformation: The critical need for integrated market design and risk management research
S.J. Deng and S.S. Oren	940	Electricity derivatives and risk management
F.F. Wu, F.L. Zheng and F.S. Wen	954	Transmission investment and expansion planning in a restructured electricity market
S.M. Amin and C.W. Gellings	967	The North American power delivery system: Balancing market restructuring and environmental economics with infrastructure security
C. Carraretto	1000	Power plant operation and management in a deregulated market
C. Lusztig, P. Feldberg, R. Orans and A. Olson	1017	A survey of transmission tariffs in North America
I. Horowitz and C.K. Woo	1040	Designing Pareto-superior demand-response rate options
M.K. Heiman	1052	Expectations for renewable energy under market restructuring: the U.S. experience
J.N. Swisher and M.C. McAlpin	1067	Environmental impact of electricity deregulation

C. Baskette, B. Horii, E. Kollman and S. Price	1084	Avoided cost estimation and post-reform funding allocation for California's energy efficiency programs
E. Vine, C.H. Rhee and K.D. Lee	1100	Measurement and evaluation of energy efficiency programs: California and South Korea

NUMBERS 8–9

B. Chen and G.Q. Chen	1115	Exergy analysis for resource conversion of the Chinese Society 1993 under the material product system
J.B. Soares, A.S. Szklo and M.T. Tolmasquim	1151	Alternative depreciation policies for promoting combined heat and power (CHP) development in Brazil
L. Liu, L. Aye, Z. Lu and P. Zhang	1167	Analysis of the overall energy intensity of alumina refinery process using unit process energy intensity and product ratio method
S. Vijayaraghavan and D.Y. Goswami	1177	A combined power and cooling cycle modified to improve resource utilization efficiency using a distillation stage
T. BenDor and A. Ford	1197	Simulating a combination of feebates and scrappage incentives to reduce automobile emissions
S.D. Pohekar and M. Ramachandran	1215	Multi-criteria evaluation of cooking devices with special reference to utility of parabolic solar cooker (PSC) in India
L.Z. Zhang	1228	Energy performance of independent air dehumidification systems with energy recovery measures
M. Canakci and I. Akinci	1243	Energy use pattern analyses of greenhouse vegetable production
A. Lazzaretto and G. Tsatsaronis	1257	SPECO: A systematic and general methodology for calculating efficiencies and costs in thermal systems
C.K. Woo, A. Olson and I. Horowitz	1290	Market efficiency, cross hedging and price forecasts: California's natural-gas markets
S.O. Jekayinfa and A.I. Bamgboye	1305	Estimating energy requirement in cashew (*Anacardium occidentale* L.) nut processing operations
P. Purohit, A.K. Tripathi and T.C. Kandpal	1321	Energetics of coal substitution by briquettes of agricultural residues
E.H. Amer	1332	Passive options for solar cooling of buildings in arid areas

NUMBERS 10–11

N. Houbak, B. Elmegaard, B. Qvale and M.J. Moran	1345	Editorial Introduction
T. Ahadi-Oskui, H. Alperin, I. Nowak, F. Cziesla and G. Tsatsaronis	1346	A relaxation-based heuristic for the design of cost-effective energy conversion systems
T. Álvarez, A. Valero and J.M. Montes	1358	Thermoeconomic analysis of a fuel cell hybrid power system from the fuel cell experimental data
S.K. Andersen, H. Carlsen and P.G. Thomsen	1371	Preliminary results from simulations of temperature oscillations in Stirling engine regenerator matrices
E. Andersson, S. Harvey and T. Berntsson	1384	Energy efficient upgrading of biofuel integrated with a pulp mill
N. Auner and S. Holl	1395	Silicon as energy carrier—Facts and perspectives
G.L. Berta, A.P. Prato and L. Garbarino	1403	Design criteria for distributed cogeneration plants
M. Bianchi, F. Cherubini, A. De Pascale, A. Peretto and B. Elmegaard	1417	Cogeneration from poultry industry wastes: Indirectly fired gas turbine application

J. Bugge, S. Kjær and R. Blum	1437	High-efficiency coal-fired power plants development and perspectives
D. Cocco, V. Tola and G. Cau	1446	Performance evaluation of chemically recuperated gas turbine (CRGT) power plants fuelled by di-methyl-ether (DME)
D. Cocco, P Deiana and G Cau	1459	Performance evaluation of small size externally fired gas turbine (EFGT) power plants integrated with direct biomass dryers
F. Cziesla, G. Tsatsaronis and Z. Gao	1472	Avoidable thermodynamic inefficiencies and costs in an externally fired combined cycle power plant
A. Ersoz, H. Olgun and S. Ozdogan	1490	Simulation study of a proton exchange membrane (PEM) fuel cell system with autothermal reforming
C.A. Frangopoulos and L.G. Nakos	1501	Development of a model for thermoeconomic design and operation optimization of a PEM fuel cell system
B.F. Möller, M. Assadi and I. Potts	1520	CO_2-free power generation in combined cycles—Integration of post-combustion separation of carbon dioxide in the steam cycle
M. Halmann and A. Steinfeld	1533	Production of lime, hydrogen, and methanol by the thermo-neutral combined calcination of limestone with partial oxidation of natural gas or coal
U. Henriksen, J. Ahrenfeldt, T.K. Jensen, B. Gøbel, J.D. Bentzen, C. Hindsgaul and L.H. Sørensen	1542	The design, construction and operation of a 75 kW two-stage gasifier
H. Jin, H. Hong and R. Cai	1554	A chemically intercooled gas turbine cycle for recovery of low-temperature thermal energy
A. Lazzaretto and C. Carraretto	1567	Optimum production plans for thermal power plants in the deregulated electricity market
A. Lazzaretto, A. Toffolo, M. Reini, R. Taccani, A. Zaleta-Aguilar, V. Rangel-Hernandez and V. Verda	1586	Four approaches compared on the TADEUS (thermoeconomic approach to the diagnosis of energy utility systems) test case
Âsa Marbe, Simon Harvey and Thore Berntsson	1614	Technical, environmental and economic analysis of co-firing of gasified biofuel in a natural gas combined cycle (NGCC) combined heat and power (CHP) plant
Nobuhiro Maruoka and Tomohiro Akiyama	1632	Exergy recovery from steelmaking off-gas by latent heat storage for methanol production
Antonio Valero and Sergio Usón	1643	Oxy-co-gasification of coal and biomass in an integrated gasification combined cycle (IGCC) power plant
Kunio Yoshikawa	1656	R&D (Research and Development) on distributed power generation from solid fuels
Na Zhang and Noam Lior	1666	A novel near-zero CO_2 emission thermal cycle with LNG cryogenic exergy utilization

NUMBER 12

	1681	Reviewers for ENERGY—The International Journal January 1, 2005–December 31, 2005
W.A. Hermann	1685	Quantifying global exergy resources
A.S. Malik and S. Al-Zubeidi	1703	Electricity tariffs based on long-run marginal costs for central grid system of Oman
V. Nikulshina, D. Hirsch, M. Mazzotti and A. Steinfeld	1715	CO_2 capture from air and co-production of H_2 via the $Ca(OH)_2$–$CaCO_3$ cycle using concentrated solar power–Thermodynamic analysis
M.J. Kaiser	1726	Hydrocarbon production cost functions in the Gulf of Mexico

S. Pradhan, B.B. Ale and V.B. Amatya	1748	Mitigation potential of greenhouse gas emission and implications on fuel consumption due to clean energy vehicles as public passenger transport in Kathmandu Valley of Nepal: A case study of trolley buses in Ring Road
M.R. Qader	1761	Optimal location of advanced static VAR compensator (ASVC) applied to non-linear load model
T. Li, M. Hassan, K. Kuwana, K. Saito and P. King	1769	Performance of secondary aluminum melting: Thermodynamic analysis and plant-site experiments
B. Cemek, Y. Demir, S. Uzun and V. Ceyhan	1780	The effects of different greenhouse covering materials on energy requirement, growth and yield of aubergine
H. Jiang, Y. Jiang, Y. Wang, Z. Ma and Y. Yao	1789	An experimental study on a modified air conditioner with a domestic hot water supply (ACDHWS)
A.D. Peacock and M. Newborough	1804	Impact of micro-combined heat-and-power systems on energy flows in the UK electricity supply industry
V. Badescu	1819	Optimum size and structure for solar energy collection systems
P. Rohdin and P. Thollander	1836	Barriers to and driving forces for energy efficiency in the non-energy intensive manufacturing industry in Sweden
K.H. LaCommare and J.H. Eto	1845	Cost of power interruptions to electricity consumers in the United States (US)
A. Beyene and J.H. Wilson	1856	Comparison of wave energy flux for northern, central, and southern coast of California based on long-term statistical wave data
L. Liu, L. Aye, Z. Lu and P. Zhang	1870	Effect of material flows on energy intensity in process industries
Y.-C. Chang	1883	An innovative approach for demand side management—optimal chiller loading by simulated annealing
S. Islam, A. Woyte, R. Belmans, P. Heskes, P.M. Rooij and R. Hogedoorn	1897	Cost effective second generation AC-modules: Development and testing aspects
G.P. Sharma and S. Prasad	1921	Specific energy consumption in microwave drying of garlic cloves
C.D. Rakopoulos and E.G. Giakoumis	1927	Comparative first- and second-law parametric study of transient diesel engine operation
A.R. Prasad and E. Natarajan	1943	Optimization of integrated photovoltaic–wind power generation systems with battery storage
J.G.S. Fonseca Jr and P.S. Schneider	1955	Simulation of a thermal power plant with district heating: Comparative results of 5 different codes
N. Nagesha and P. Balachandra	1969	Barriers to energy efficiency in small industry clusters: Multi-criteria-based prioritization using the analytic hierarchy process
C.A. Ramírez, M. Patel and K. Blok	1984	From fluid milk to milk powder: Energy use and energy efficiency in the European dairy industry
C.W. Remeljej and A.F.A. Hoadley	2005	An exergy analysis of small-scale liquefied natural gas (LNG) liquefaction processes
A.M. El-Nashar	2020	Heat loss through the piping of a large solar collector field
S. Boonnasa, P. Namprakai and T. Muangnapoh	2036	Performance improvement of the combined cycle power plant by intake air cooling using an absorption chiller
C.A. Ramírez, M. Patel and K. Blok	2047	How much energy to process one pound of meat? A comparison of energy use and specific energy consumption in the meat industry of four European countries
A. Schäfer, J.B. Heywood and M.A. Weiss	2064	Future fuel cell and internal combustion engine automobile technologies: A 25-year life cycle and fleet impact assessment

J. Han, Y. Jia, S. Jin, Y. Jing, M. Tillard and C. Belin	2088	Morphology and electrochemistry of spinel Li–Mn–O optimized by composite technology
İ.T. Öztürk, H. Karabay and E. Bilgen	2094	Thermo-economic optimization of hot water piping systems: A comparison study
R. Selbaş, Ö. Kızılkan and A. Şencan	2108	Thermoeconomic optimization of subcooled and superheated vapor compression refrigeration cycle
H.-T. Pao	2129	Comparing linear and nonlinear forecasts for Taiwan's electricity consumption
T.H. Ko and K. Ting	2142	Optimal Reynolds number for the fully developed laminar forced convection in a helical coiled tube
M.A. Yurdusev, R. Ata and N.S. Çetin	2153	Assessment of optimum tip speed ratio in wind turbines using artificial neural networks
T.-M. Tveit, J. Aaltola, T. Laukkanen, M. Laihanen and C.-J. Fogelholm	2162	A framework for local and regional energy system integration between industry and municipalities—Case study UPM-Kymmene Kaukas
S. Hernández, J. Gabriel Segovia-Hernández and V. Rico-Ramírez	2176	Thermodynamically equivalent distillation schemes to the Petlyuk column for ternary mixtures
Q.S. Jing and X.M. Zheng	2184	Combined catalytic partial oxidation and CO_2 reforming of methane over ZrO_2-modified Ni/SiO_2 catalysts using fluidized-bed reactor
J.N. Sheen	2193	Incentive pricing and economic profitability of load management program
S. Vashishtha and M. Ramachandran	2210	Multicriteria evaluation of demand side management (DSM) implementation strategies in the Indian power sector
S. Mahmud and R.A. Fraser	2226	Second law analysis of forced convection in a circular duct for non-Newtonian fluids
M.J. Prins and K.J. Ptasinski	2245	Corrigendum to "Energy and exergy analyses of the oxidation and gasification of carbon" [Energy 30 (2005) 982–1002]
	2247	Corrigendum to "Pierre Le Goff 8 February 1923–7 March 2005" [Energy 31(2–3) (2006) iii–vi]
D. Tondeur and R. Rivero	2248	Pierre Le Goff 8 February 1923–7 March 2005
	2253	Book review
S. Wang, B. Hua and Q. Chen	2256	Letter to the Editor

NUMBER 13

N. Afgan, Ž. Bogdan, N. Duić, Z. Guzović and N. Lior	2257	Editorial introduction
R. Blinc, A. Zidanšek and I. Šlaus	2259	Sustainable development after Johannesburg and Iraq: The global situation and the cases of Slovenia and Croatia
A.P. Hannoura, G.M. Cothren and W.M. Khairy	2269	The development of a sustainable development model framework
M. Lipošćak, N.H. Afgan, N. Duić and M. da Graça Carvalho	2276	Sustainability assessment of cogeneration sector development in Croatia
Ž. Bogdan and D. Kopjar	2285	Improvement of the cogeneration plant economy by using heat accumulator
F. Hvelplund	2293	Renewable energy and the need for local energy markets

D. Beysens, M. Muselli, I. Milimouk, C. Ohayon, S.M. Berkowicz, E. Soyeux, M. Mileta and P. Ortega	2303	Application of passive radiative cooling for dew condensation
F. AlKhal, R. Chedid, Z. Itani and T. Karam	2316	An assessment of the potential benefits from integrated electricity capacity planning in the northern Middle East region
H. Lund	2325	The Kyoto mechanisms and technological innovation
M. Sarmento, D. Durão and M. Duarte	2333	Analysis of companies' environmental strategies for a green society
Y. Obata, K. Takeuchi, N. Soma and K. Kanayama	2341	Recycling of wood waste as sustainable industrial resources—Design of energy saving wood-based board for floor heating systems
J. Schmandt	2350	Bringing sustainability science to water basin management
G. Raluy, L. Serra and J. Uche	2361	Life cycle assessment of MSF, MED and RO desalination technologies
A. Said, G. Sehlke, D.K. Stevens, T. Glover, D. Sorensen, W. Walker and T. Hardy	2373	Exploring an innovative watershed management approach: From feasibility to sustainability
Y.A. Zeigarnik	2387	Some problems with the development of combined generation of electricity and heat in Russia
J. Klemeš, F. Friedler and N. Lior	2395	PRES conferences: Energy efficiency and environmental protection
M. Gadalla, Ž. Olujić, M. Jobson and R. Smith	2398	Estimation and reduction of CO_2 emissions from crude oil distillation units
M. Gadalla, Ž. Olujić, A. de Rijke and P.J. Jansens	2409	Reducing CO_2 emissions of internally heat-integrated distillation columns for separation of close boiling mixtures
S.S. Voutetakis, P. Seferlis, S. Papadopoulou and Y. Kyriakos	2418	Model-based control of temperature and energy requirements in a fluidised furnace reactor
E.S. Kikkinides, M.C. Georgiadis and A.K. Stubos	2428	Dynamic modelling and optimization of hydrogen storage in metal hydride beds
C.A. Cardona Alzate and O.J. Sánchez Toro	2447	Energy consumption analysis of integrated flowsheets for production of fuel ethanol from lignocellulosic biomass
A. Chiarioni, A.P. Reverberi, B. Fabiano and V.G. Dovì	2460	An improved model of an ASR pyrolysis reactor for energy recovery

NUMBER 15

R. Rivero, J. Hernández and N. Lior	3081	Editorial Introduction
Ž Olujić, L. Sun, A. de Rijke and P.J. Jansens	3083	Conceptual design of an internally heat integrated propylene-propane splitter
K. Takeshita and M. Ishida	3097	Optimum design of multi-stage isotope separation process by exergy analysis
M. Kaeser and C.L. Pritchard	3108	The impact of heat transfer on Murphree tray efficiency
H. Li, F. Maréchal, M. Burer and D. Favrat	3117	Multi-objective optimization of an advanced combined cycle power plant including CO_2 separation options
K.J. Ptasinski, M.N. Koymans and H.H.G. Verspagen	3135	Performance of the Dutch Energy Sector based on energy, exergy and Extended Exergy Accounting
C. Carraretto and A. Zigante	3145	Interaction among competitive producers in the electricity market: An iterative market model for the strategic management of thermal power plants
P.-A. Haldi and D. Favrat	3159	Methodological aspects of the definition of a 2 kW society
M. Halmann and A. Steinfeld	3171	Fuel saving, carbon dioxide emission avoidance, and syngas production by tri-reforming of flue gases from coal- and gas-fired power stations, and by the carbothermic reduction of iron oxide
A. Corrado, P. Fiorini and E. Sciubba	3186	Environmental assessment and extended exergy analysis of a "zero CO_2 emission", high-efficiency steam power plant
R. Cornelissen, E. Tober, J. Kok and T. van de Meer	3199	Generation of synthesis gas by partial oxidation of natural gas in a gas turbine
L. Lombardi, E. Carnevale and A. Corti	3208	Greenhouse effect reduction and energy recovery from waste landfill
S. Grönkvist, M. Bryngelsson and M. Westermark	3220	Oxygen efficiency with regard to carbon capture
M. Villalobos, A. Awojulu, T. Greeley, G. Turco and G. Deeter	3227	Oligomeric chain extenders for economic reprocessing and recycling of condensation plastics

D.M. Paulus and G. Tsatsaronis	3235	Auxiliary equations for the determination of specific exergy revenues
V. Verda	3248	Accuracy level in thermoeconomic diagnosis of energy systems
M. Modesto and S.A. Nebra	3261	Analysis of a repowering proposal to the power generation system of a steel mill plant through the exergetic cost method
F. Calise, M. Dentice d'Accadia, A. Palombo and L. Vanoli	3278	Simulation and exergy analysis of a hybrid Solid Oxide Fuel Cell (SOFC)–Gas Turbine System
E.R. Delsman, C.U. Uju, M.H.J.M. de Croon, J.C. Schouten and K.J. Ptasinski	3300	Exergy analysis of an integrated fuel processor and fuel cell (FP–FC) system
R. Rivero and M. Garfias	3310	Standard chemical exergy of elements updated
D.F. Rancruel and M.R. von Spakovsky	3327	Decomposition with thermoeconomic isolation applied to the optimal synthesis/design and operation of an advanced tactical aircraft system
A. Franco and N. Giannini	3342	A general method for the optimum design of heat recovery steam generators
J. Malça and F. Freire	3362	Renewability and life-cycle energy efficiency of bioethanol and bio-ethyl tertiary butyl ether (bioETBE): Assessing the implications of allocation
M. Nava, J. Gasca and U. González	3381	The energy demand and the impact by fossil fuels use in the Mexico City Metropolitan Area, from 1988 to 2000
G. Montero, R. Pulido, C. Pineda and R. Rivero	3391	Ecotaxes and their impact in the cost of steam and electric energy generated by a steam turbine system
A. Vidal, R. Best, R. Rivero and J. Cervantes	3401	Analysis of a combined power and refrigeration cycle by the exergy method
C.Y. Nakashima, S. de Oliveira Jr. and E.F. Caetano	3415	Heat transfer in a twin-screw multiphase pump: Thermal modeling and one application in the petroleum industry
E. Andersson and S. Harvey	3426	System analysis of hydrogen production from gasified black liquor
J.C. Cao and S.H. Cao	3435	Study of forecasting solar irradiance using neural networks with preprocessing sample data by wavelet analysis
S. van der Linden	3446	Bulk energy storage potential in the USA, current developments and future prospects
M.J. Prins, K.J. Ptasinski and F.J.J.G. Janssen	3458	More efficient biomass gasification via torrefaction
